

# Business Intelligence Analyst

Location: Bengaluru, India

## Role Summary

We are hiring a Business Intelligence Analyst to support retail reporting, dashboard development, and business performance analysis. The candidate will work with stakeholders across merchandising, sales, finance, and operations to build dashboards, monitor KPIs, and convert raw data into actionable business insights.

## Required Qualifications

- 2+ years of total analytics or BI experience.
- Strong SQL skills for querying, joins, aggregations, and reporting logic.
- Hands-on Tableau experience for dashboard development and maintenance.
- Experience working with retail or consumer business data.
- Strong communication and stakeholder management skills.

## Mandatory Requirements

- SQL is mandatory.
- Tableau is mandatory.
- Minimum 24 months of Tableau experience is required.
- Minimum 24 months of total professional experience is required.
- Candidate must have experience in retail analytics or retail reporting.

## Preferred Qualifications

- Experience with Python for automation or analysis.
- Experience with Power BI.
- Familiarity with inventory, sales, and margin reporting.
- Ability to translate business questions into KPI dashboards.

## Key Responsibilities

- Design and maintain Tableau dashboards for business and operations teams.
- Write optimized SQL queries for recurring and ad hoc reporting.
- Analyze sales, returns, inventory, and category trends.
- Partner with business stakeholders to define metrics and reporting views.
- Support monthly and weekly review cadences with timely insight generation.

## Evaluation Notes

- Strong evidence of SQL ownership in recent roles.
- Clear dashboard-building experience in Tableau.

- At least 24 months of Tableau usage.
- Exposure to retail domain data.
- Ability to explain business impact from analytics work.
